

International Statistical Expertise for Market Access

Numerus provides **statistical expertise** for the planning and analysis of **health technology assessments (HTA)** as well as for the successful **reimbursement** of drugs, medical devices and diagnostics.

Industry is now faced with many new challenges:

- How do I design a trial to assess comparative effectiveness?
- Are the data from my phase III study enough to support reimbursement?
- Can I use surrogate endpoints to replace clinically relevant endpoints?
- What is a Network-Meta-Analysis? How do I conduct indirect treatment comparisons?
- How do I interpret the IQWiG guidelines?

Numerus can make sure that you meet these challenges head-on.

Local Expertise

With personnel throughout Europe, Numerus is unique in being able to understand country-specific requirements. This, combined with its international experience in conducting analyses of clinical trials, makes Numerus the ideal partner when you need a responsive and comprehensive statistical service for market access.
