

# Safeguarding Your Phase I-III Development

**We know your trial can't afford to fail.** Obtaining the right statistical support is vital. You need a statistical partner with the necessary professionalism, experience and quality.

Our statisticians have been providing expertise on the design, analysis and reporting of phase I-III clinical trials for more than 20 years across a wide range of therapeutic indications.

We perform all our activities according to ICH/GCP, regulatory standards, and the highest internal standard procedures. Our expertise includes:

- Protocol development & sample size calculation
- Analysis planning & CRF/edit check review
- Statistical analysis using SAS, SAS JMP, R and WinBUGS
- Interim analysis and DSMB/DMC support.

## Discover Statistical Power

We provide strategic support in order to maximise your trial's chances of success, whilst simultaneously reducing both timelines and costs.

Companies worldwide, from the smallest biotechs to the largest pharmaceuticals, have turned to us for statistical support.
